#### General Details

Blown out on the Saturday so we decided to stay in London until Saturday afternoon.

Drove down to Swanage and had a nice evening enjoying the tonnes of live music in Swanage's many pubs. Caravan site was really good and should be seriously considered as an accommodation option for future trips.

The shuttle service is a very cost effective alternative to running the club boats, if you are limited by number of drivers and people that can tow the boats. Both services will also run with only 2 divers which makes it very useful for smaller club trips.

Since Swanage is less than 3 hours drive from London this could be considered for day trips in the future.

Thanks to Ken for helping organise accommodation, and Chris and Ivan for supplying cars and driving skills.
